

Bangladesh Agricultural University is going to be represented globally by TEDxBAU event.

TED Conferences, LLC (Technology, Entertainment, Design) is an American Canadian non-profit media organization that posts international talks online for free distribution under the slogan "ideas worth spreading." TED was founded by Richard Saul Wurman and Harry Marks in February 1984 as a tech conference, in which Mickey Schulhof gave a demo of the compact disc that was invented in October 1982. It has been held annually since 1990. TED covers almost all topics – from science to business to global issues – in more than 100 languages. To date, more than **13,000 TEDx events** have been held in at least **150 countries**.

Mission of TED: Spread ideas

A TEDx event is a local gathering where live TED-like talks and performances are shared with the community. TEDx events are fully planned and coordinated independently, on a community-by-community basis. The content and design of each TEDx event is unique and developed independently, but all of them have features in common.

According to this, some of the renowned universities of Bangladesh have got the license to arrange TEDx events in their campus as they are capable of spreading ideas, motivations and developing processes to their university communities. On recent years some of the universities including **BUET, KUET, RUET, NSU, BSMRAU, SUST** & some other universities have arranged their local events.

Bangladesh Agricultural University, the mother of all agricultural universities is now licensed to arrange TEDx events independently in the campus. The students of **Bangladesh Agricultural University Career Club** event for the very first time. They are international platform where most of the

In this year, the event is going to be held event is- **"Let's Protect The Future We Choose"**

In this countdown event, their aim is to spreading ideas, works on our climate solutions. They want to bring up sustainable food choices and growing up areas of opportunity for a healthier lifestyle. They're also focusing into clean energy solutions that can positively alter the impact of natural disasters. They
